procyon X

Version 1.17

The most extensive Astronomy program for the Psion Series 5mx

Pedro van Can and John Sussenbach

Last update January 18, 2003

Pour nos utilisateurs françaises: PROCYON X 1.12 version française

- **When we take a long look at the sky on a clear, starry night, have you not been awed by its vastness and the beauty? The distant stars and galaxies appear to be fixed and unchanging, but actually you are observing a small portion of a dynamic universe. PROCYON X is a Universe in the Palm of your Hands... It is the most extended Astronomy software for the Psion Series 3a/c and 5/5mx. This small program is packed full of information including the Yale Star Catalogue, all Messier objects and the NGC Catalogue, Graphs and Tables, and much, much more!**

PROCYON X is available as a PROCYON X Light version (freeware) and a PROCYON X Pro version (shareware). Compared to the Light version the PROCON X Pro version has a number of extra features:

- The Yale Star database is extended from magnitude 4.0 (Light) to magnitude 5.0 (Pro) (1600+ items);
- The complete NGC Catalogue of Deep Sky objects (7800+ items);
- The Reference-star Database with stars to magnitude 6 is available in the Zoom-window;
- More than 750 Minor Planets and Comets;

- Pictures of all 110 Messier Objects;
- Jovian Red Spot visibility option;
- Constellation Identification;
- "Moving" Planets in the Solar System View;
- Constellation Names in Normal and Zenith View;
- Lunar Eclipse Graph.

Here follow some screen pictures:

Zooming in on the Moon

Procyon X Light	

 888 Kb Download the latest version of **Procyon X 1.17**
SIS-package
Right-Click hyperlink and choose 'Save Link As'

To Install:

🌐 In the System screen of your Series 5, tap the top toolbar button ("Control Panel") and check if the "Add/Remove" icon is available. If it is not, copy the following file to your Series 5, select it (in the System screen) and press Enter.

 58 Kb Download the latest version of **Standard SIS installer**
Executable file
Right-Click hyperlink and choose 'Save Link As'

This should install the Add/Remove icon to your control panel. For the latest information about SIS files see http://www.psion.com

462 Kb Download the latest version of **Procyon X 1.17**
ZIP compressed package

To Install:
- Make sure you can see the SYSTEM directory on your Psion 5.
- Go to either C:\System\Apps\ or D:\System\Apps\
- 'Make a new folder' and name it PROCYON
- Do not change this name or else you will not see the program on the Extra's bar.
- Copy all the Procyon files into this directory.
- When you press the 'Extras' button, a PROCYON X Icon will appear.
- Put RMRAlarm.opx in C:\SYSTEM\OPX.

Procyon X Pro	

The Light version of PROCYON X is **free for non-commercial** use and can be considered freeware.
But you can also see this version as a shareware program and once you register you'll have added benefits.

Detailed list and pictures of differences between the light and the Pro version.

If you have registered Procyon X and received a **5Procyon.Key** file, you'll also need the Auxilary pack which includes some files only used (and needed) within the Pro version of Procyon X.

955 kB Download the **Procyon X Auxiliary Pack**
SIS Package - You can only use this file if you have a valid '5Procyon.Key' file!
Right-Click hyperlink and choose 'Save Link As'

473 kB Download the **Procyon X Auxiliary Pack**
ZIP compressed Package - You can only use this file if you have a valid '5Procyon.Key' file!

New Event file for 2001 !	

Download the latest version of **5EVENT.DBF**
containing information of a number of major astronomical events in the year 2001

16 Kb

Install 5EVENT.DBF in the SYSTEM/APPS/PROCYON directory on your Psion 5

THANK YOU's	

Special thanks to:
Milan Tjioe for his Freeware Macro SwitchPoint, to switch the decimal separator to a point. You can download this Macro from here

2 kB   Download the **Switchpoint for Psion 5**
ZIP compressed Package

2 kB   Download the **Switchpoint for Psion 5 MX**
ZIP compressed Package

You win the 5ème DimenPsion Award.
The Best software on Psion with 34.8% of the votes (around 250 psionnist).

The staff at **PsionKing** has reviewed our program with 5 cows! They say:
"This is an advanced astronomy program with the most amazing graphics and a huge database of astronomical elements. Highly recommended."

REGISTRATION	

Procyon X can be registered Online for your convience at:

US$ 35

RegNet - The Registration Network.
Register Procyon X at
http://www.swregnet.com/1703p.htm
or call 1 800 WWW2REG or (805) 288-1827.

US$ 30

Click here to REGISTER
this software ONLINE!

F.A.Q.	

- If you have a previous Procyon version, remove Procyon.INI before installation;
- X really has no meaning but could be interpreted as: Xtreme, Xtra, Xtraordinair, Xtra Large.
- Procyon X doesn't always use the 16 color mode, this is on purpose because this mode uses a lot more memory-, processor- and display- power and thus drains the batteries faster.
- **Switch your decimal seperator to dot instead of comma, so a value like 1.998 equals almost 2 instead of 1998.**

For more information on downloading of the program, visit:
